OBJECTIVE

Detail-oriented Computer Science Engineering graduate with strong proficiency in **SQL, data reporting, and analytics**. Hands-on experience in writing optimized queries, working with **Excel, MySQL**, and developing data-driven dashboards. Seeking for an Opportunity to leveraging technical and analytical skills in a fast-paced, data-centric environment.

EDUCATION

B.Tech in Computer Science Engineering

Bengal College of Engineering and Technology, Durgapur
GPA – 8.88

West Bengal, India |2019 - 23

Intermediate from CBSE Board

Indian School of Learning, Sudamdih
Percentage – 74.3%

Jharkhand, India |2017 - 2019

Matriculation from CBSE Board

Indian School of Learning, Sudamdih
CGPA – 9.4

Jharkhand, India |2016 - 2017

SKILLS

- Programming Language: **JAVA, OOPs (Object Oriented Programming)**
- Databases & Technologies: **SQL, MYSQL, DBMS, MongoDB**
- Web Development: **HTML, CSS, Bootstrap, JavaScript, JQuery, Node.js, Express.js, React.js**
- Development Tools: **Git, Shell Scripting**
- **Problem-Solving & Critical Thinking**

CERTIFICATES

- **WIPRO Talentnext Student Training Engagement** [Certificate](#)
Digital Skills Readiness Program Course Completion Certificate – **Java J2EE**
- **Ardent CompuTech PVT. Ltd.** [Certificate](#)
Industrial Training Certificate – **JAVA Programming**
- **AICTE EDUSKILLS** [Certificate](#)
Virtual Internship Completion Certificate – **AWS Cloud Computing**
- **UDEMY** [Certificate](#)
Learn SQL using MYSQL and Database Design – **SQL**

PROJECTS

DATA-DRIVEN WEATHER FORECASTING WEBSITE

- Designed and developed a Weather Forecasting Website using HTML, CSS, JavaScript, and Vanilla tilt.js.
- Integrated OpenWeatherMap & OpenCageData APIs for real-time data collection.
- Implemented features such as temperature, weather type, wind speed, and humidity display, with dynamic UI changes based on user input.
- **Impact:** Improved user accessibility by creating an intuitive interface with real-time updates.

SQL-BASED DATA ANALYTICS FOR DECISION-MAKING

- Wrote complex **SQL queries** to extract and analyze data from large datasets.
- Created views and stored procedures for performance-friendly execution.
- Built Excel-based dashboards to visualize sales and product trends.
- **Impact:** Enabled better decision-making through structured data representation.
